

Lookbook. Volume 1

**AQUATIC
SURFACES
FOR LITTLE
CHAMPIONS!**

An aerial photograph of a waterfront park. On the left, a splash pad with several water jets and colorful circular structures is visible. A wide, paved walkway runs along the water's edge, bordered by a metal railing with chain-link fencing. The water is a deep blue. In the foreground, a green roof of a building is partially visible. The overall scene is bright and sunny.

TRANSFORMING AQUATIC SPACES

THE PURPOSE

THE TILES, THE ULTIMATE SOLUTION

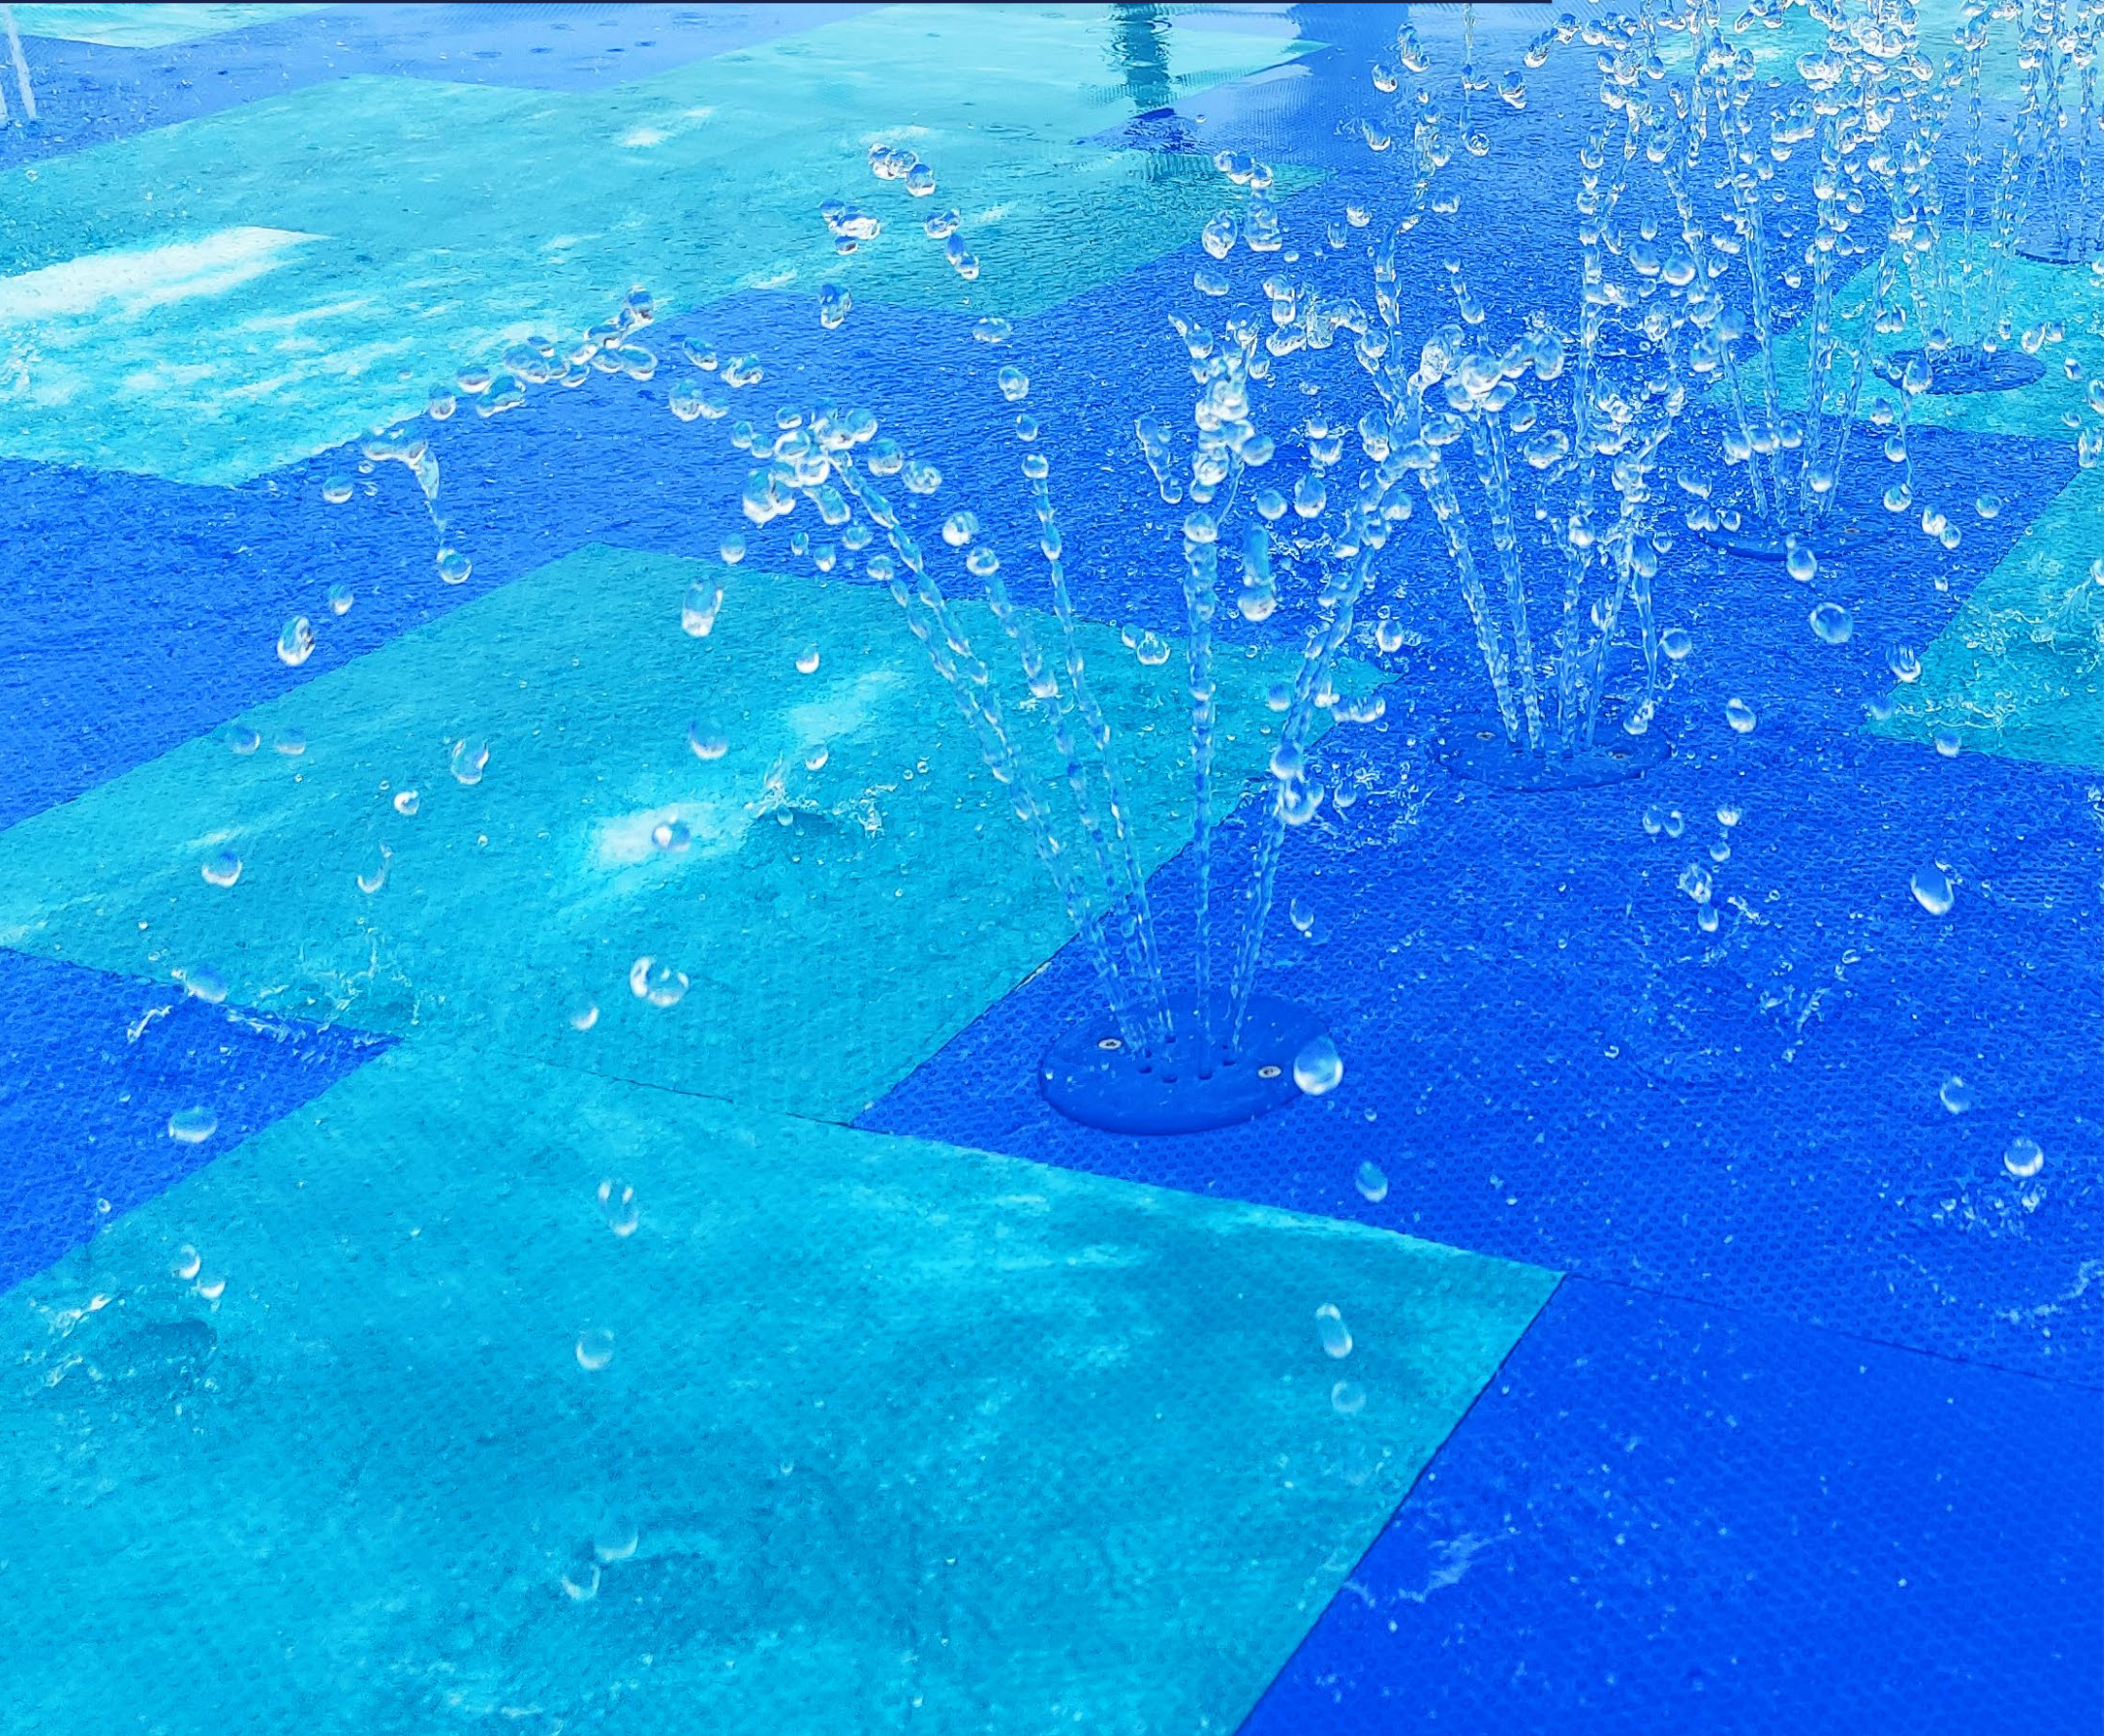

Gomyfloor’s certified tiles, offering slip-resistant and cushioned properties, are designed for lasting durability in aquatic environments.

MINIMIZE RISK, ELEVATE ENJOYMENT

Gomyfloor’s purpose is to ensure safety across all aquatic environments.

MADE IN
SPAIN

PROPERTIES AND APPLICATIONS

Engineered for aquatic environments with barefoot traffic, Gomyfloor’s foam-rubber tile serves as a **safety surface** and excels in areas such as:

- Splash Park
- Waterparks
- Pool Decks
- Zero-depth entries
- Slide stairs

MAIN FEATURES

- + Slip resistance
- + Cushioning
- + UV Resistance
- + Anti-bacteria
- + Waterproofing
- + Chemical Resistance
- + Hygienic

The presence of soft, cushioned, and textured flooring **diminishes the chances of slip-and-fall accidents.**

FEATURED PROJECTS

Area: 80 m²
Thickness: 10 mm
Colours: Royal Blue 333,
Cyan Blue 598, Azul Lápiz 332.

COLORS, FORMATS AND PATTERNS

Gomyfloor stands out with its diverse array of exquisite **colors**, varying **thicknesses**, and an assortment of **shapes**. Approximate colors.

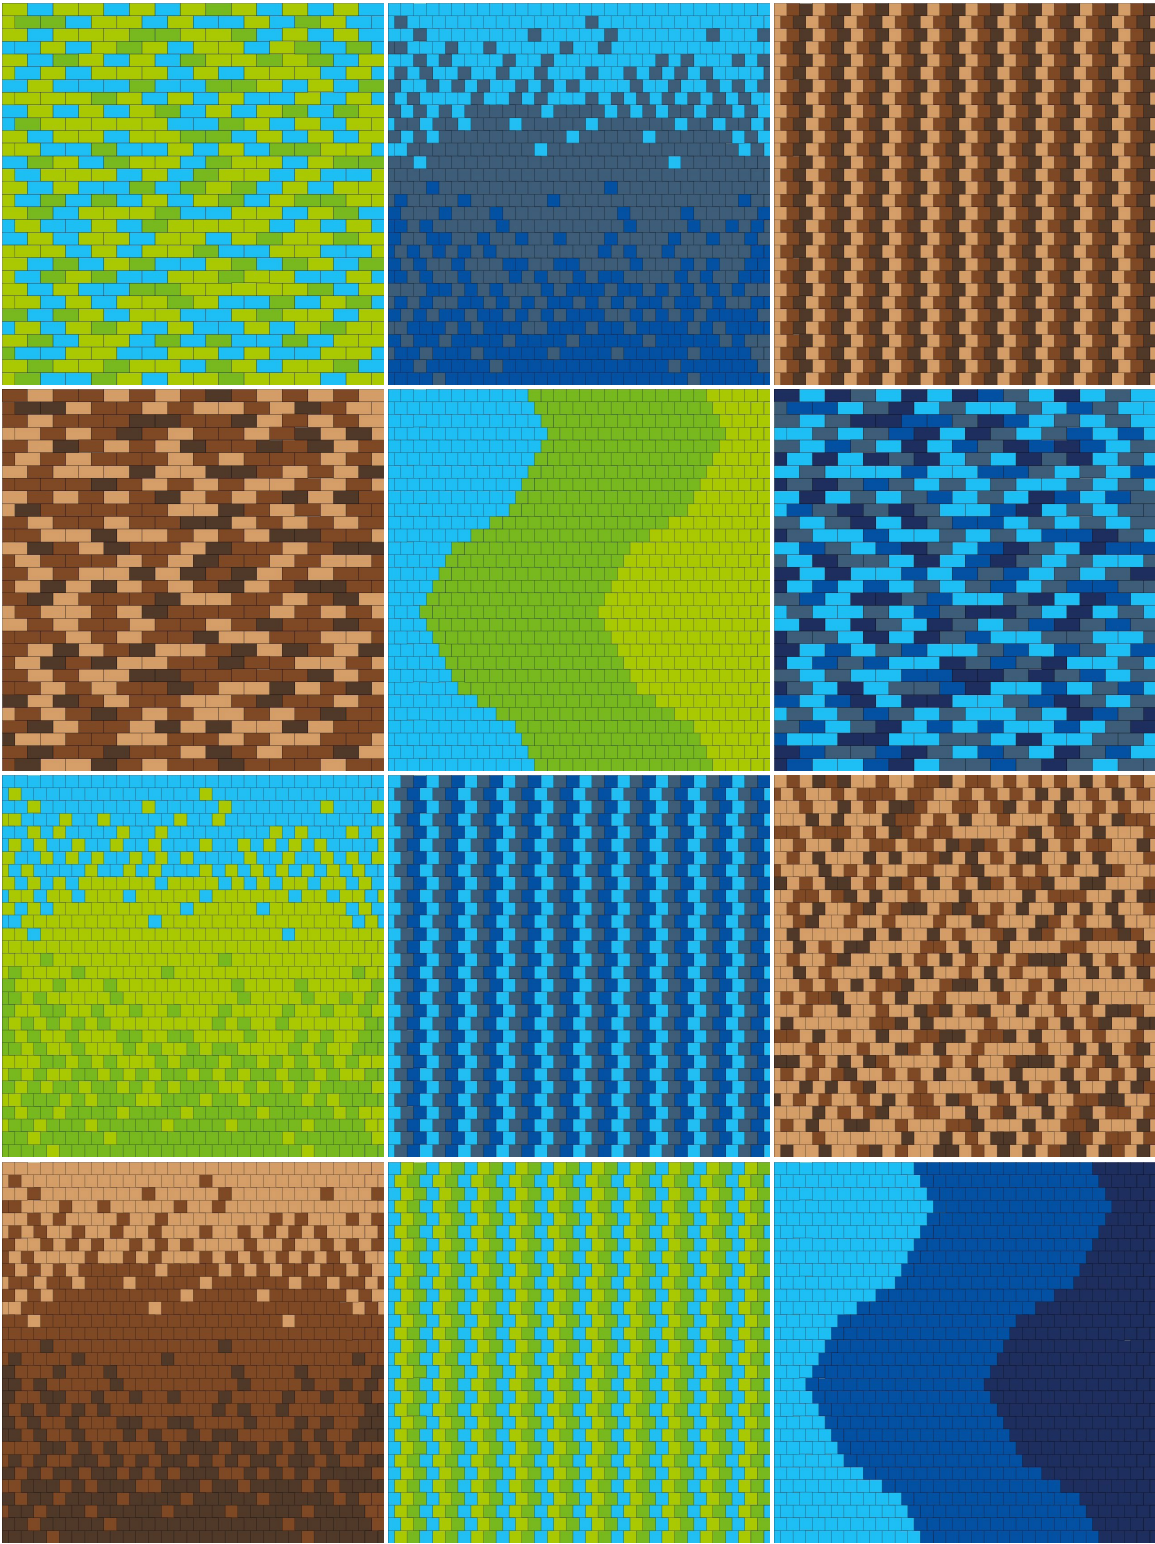

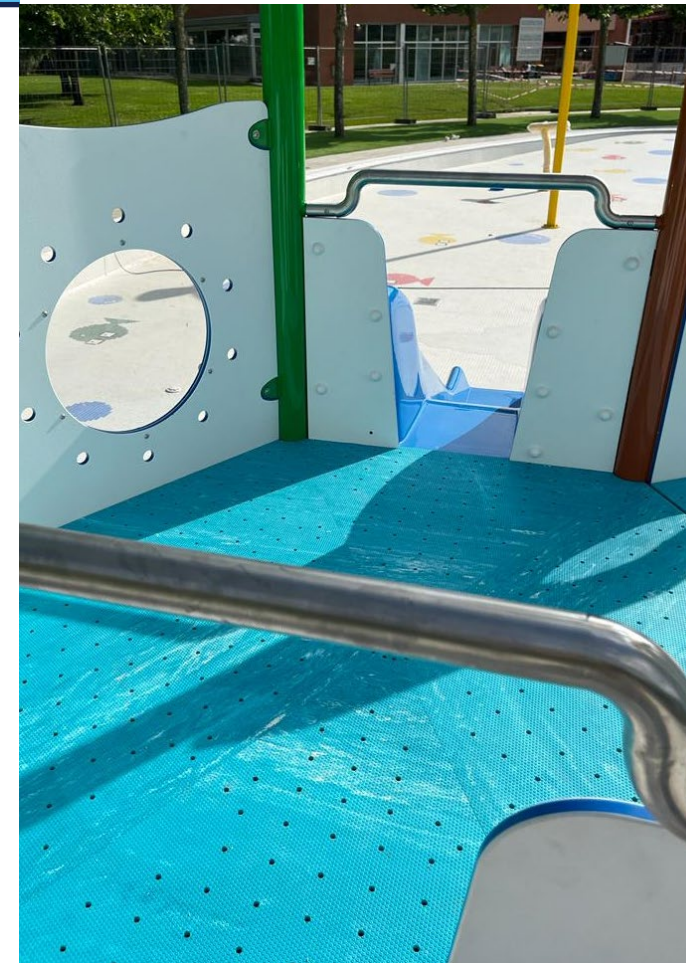

Upon request, custom shapes are available and can be precision-cut at the factory, albeit with potential pricing implications.

Tiles are available in three distinct thickness options: 10mm, 20mm, and 30mm (please inquire for pricing details).

To facilitate your creative vision, we've meticulously crafted **pre-defined color patterns** that showcase the extensive spectrum of color combinations achievable.

**We advise performing the rounding cuts during the same installation.*

Furthermore, we offer a range of finishes tailored to specific applications.

- Landing pads
- Edge Pads
- Transition strips

While our customization options grant you the freedom to personalize, it's essential to note that such bespoke designs may influence pricing and installation timelines.

Beyond this, we extend our capabilities to include **graphic designs, logos, and branding** to bring your unique concepts to life upon request.

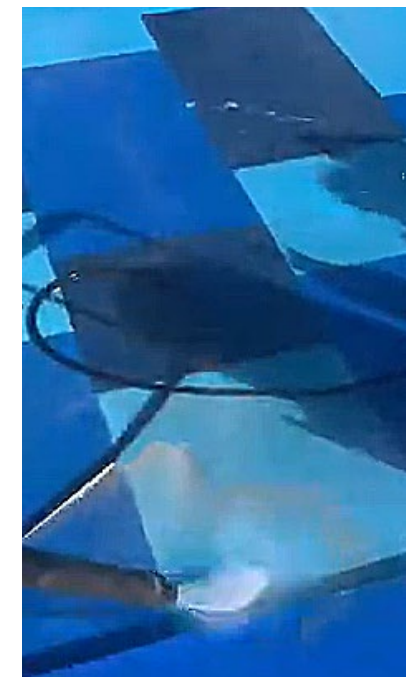

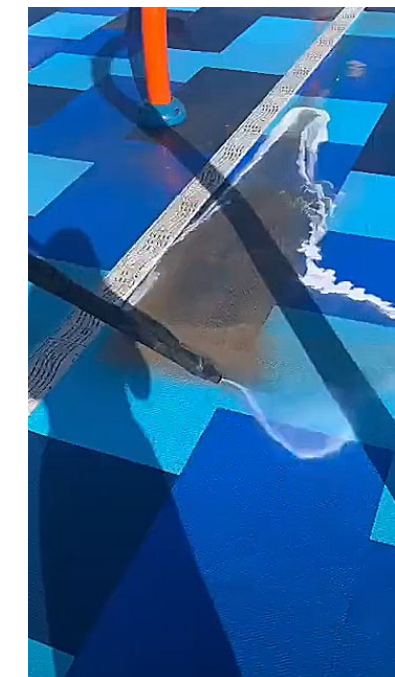

PRESERVE THE RADIANCE!

In contrast to other types of traditional flooring, **dirt is quickly removed**, revealing the inherent shine of the tiles.

This speed, together with the **low water consumption**, will significantly extend the life of the tiles, thus minimizing the need for extensive long-term maintenance.

Maintaining the impeccable appearance and hygiene of aquatic flooring tiles has **never been more efficient**.

With a carefully designed cleaning regimen, the process is both easy and remarkably swift, taking under **20 minutes to complete**.

We recommend pressurized water, as well as **the use of detergents**, which play a crucial role in preventing the deposition of dirt, such as dust or salts, and will preserve the integrity of the tiles and their aesthetic appeal.

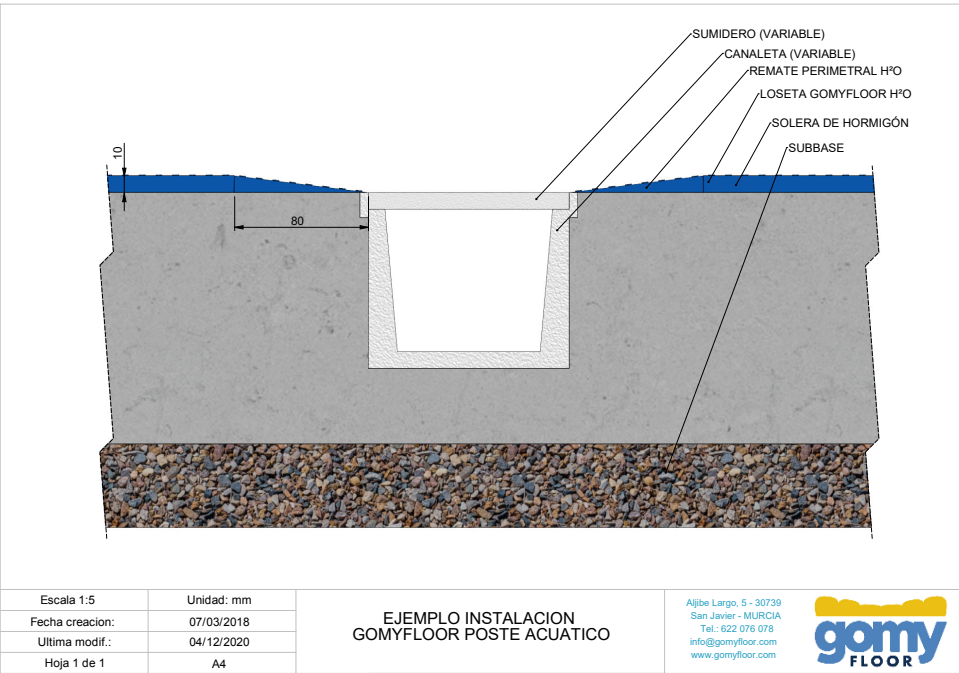

STUDIO

Gomyfloor’s Studio is the ultimate ally for our partners.

Its purpose is to **bring our clients’ envisioned ideas to life**, considering installation specifics, drainage, surface features, while also **suggesting thematic and customization possibilities**.

It also **collaborates with our sales** team to align with our partner’s project budgeting. **Renderings are also offered**.

Product development and innovations.
The studio also collaborates with engineers from the R&D department for product development.

BEYOND THE TILES

Partnerships. The significance of our partners, including designers and installers, is pivotal for the long-term success of our project. Local partners are in constant contact with the market and possess a deep understanding of its needs. Their satisfaction directly influences the contentment of end clients.

Profitability and budget adequation. We recognize the importance of aligning with market budgets as we strive towards our ultimate objective: transforming a multitude of surfaces that currently lack security or long-term resilience. Maintaining competitiveness is key, empowering our partners to play a pivotal role in this transformative journey.

Flexibility. As a European manufacturer, we possess the capability to distribute our product across various geographic regions. With significant production capacity and ongoing stock investments, we enhance delivery times across all our offerings.

Excellence in Service. We recognize that a company's greatest asset is its human resources. Our sales department is well-equipped with language and cultural expertise. Driven by ambition, humility, and energy, we are committed to continued international growth through robust partnerships with our global associates.
